# Biotecnología Vegetal. Una larga historia

Domesticación y  
selección

# La Domesticación: Ganancias

Rendimiento  
Sabores  
Colores  
Homogeneidad

# La Domesticación: Pérdidas

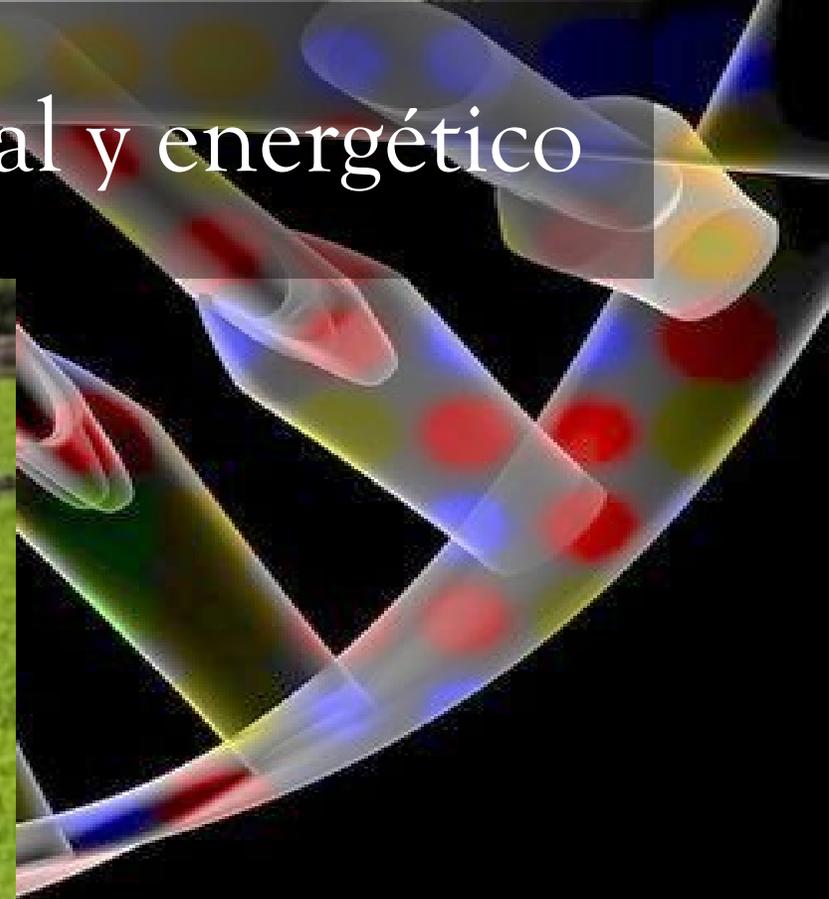

Resistencia a plagas, a bacterias, a virus, etc.

Tolerancia a sequía, a frío, etc.

Diversidad genética

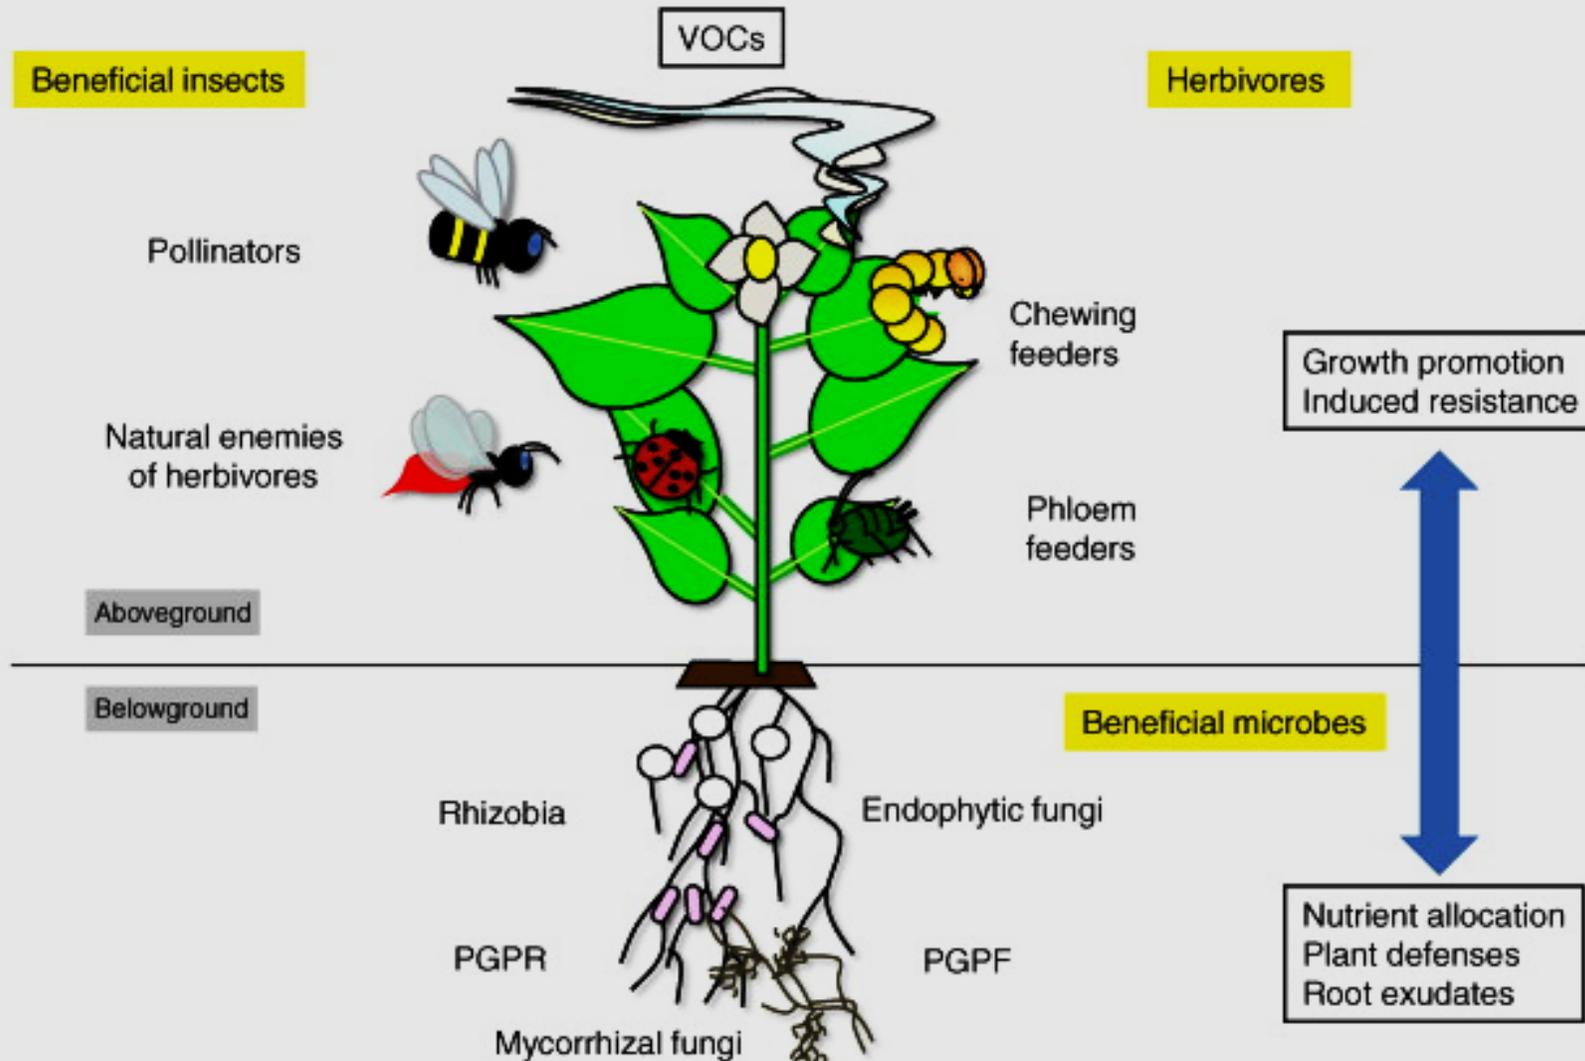

# Monocultivos intensivos. Costo ambiental y energético

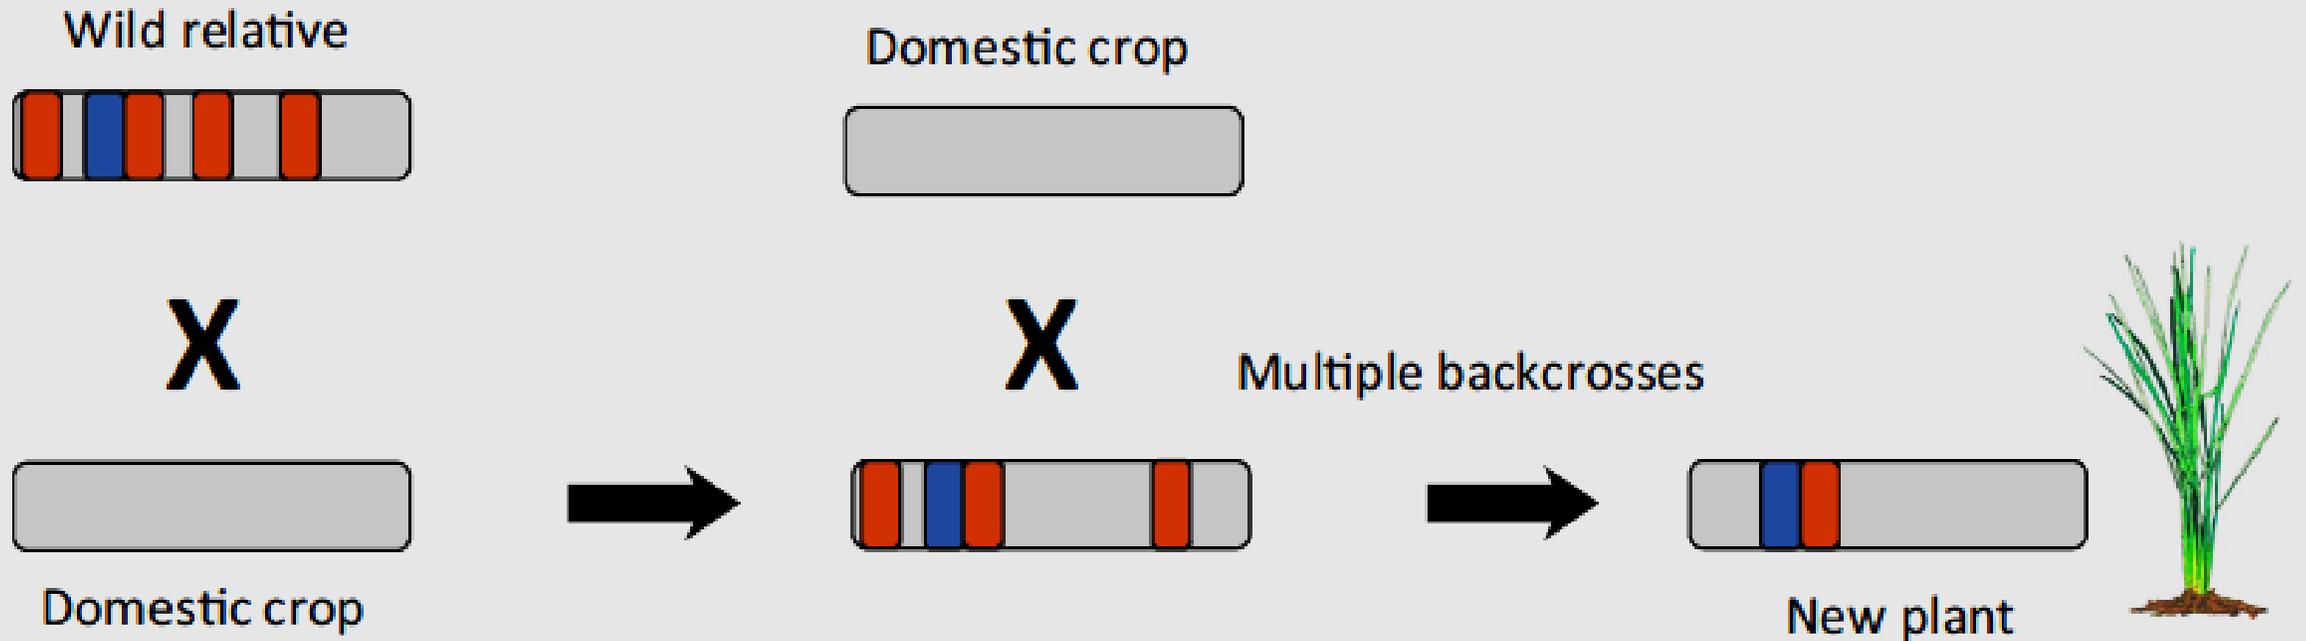

ECOSUR

# Plantas diseñadas para Manejo Integrado de Plagas

# Resilvestrización: Reintroducir genes silvestres

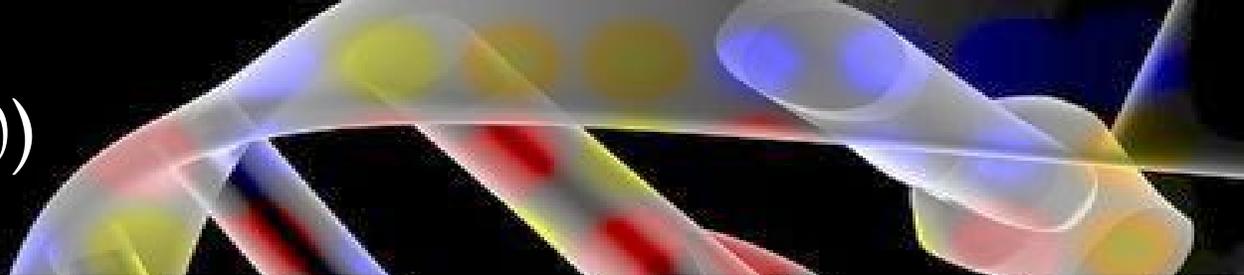

## (A) Introgression breeding

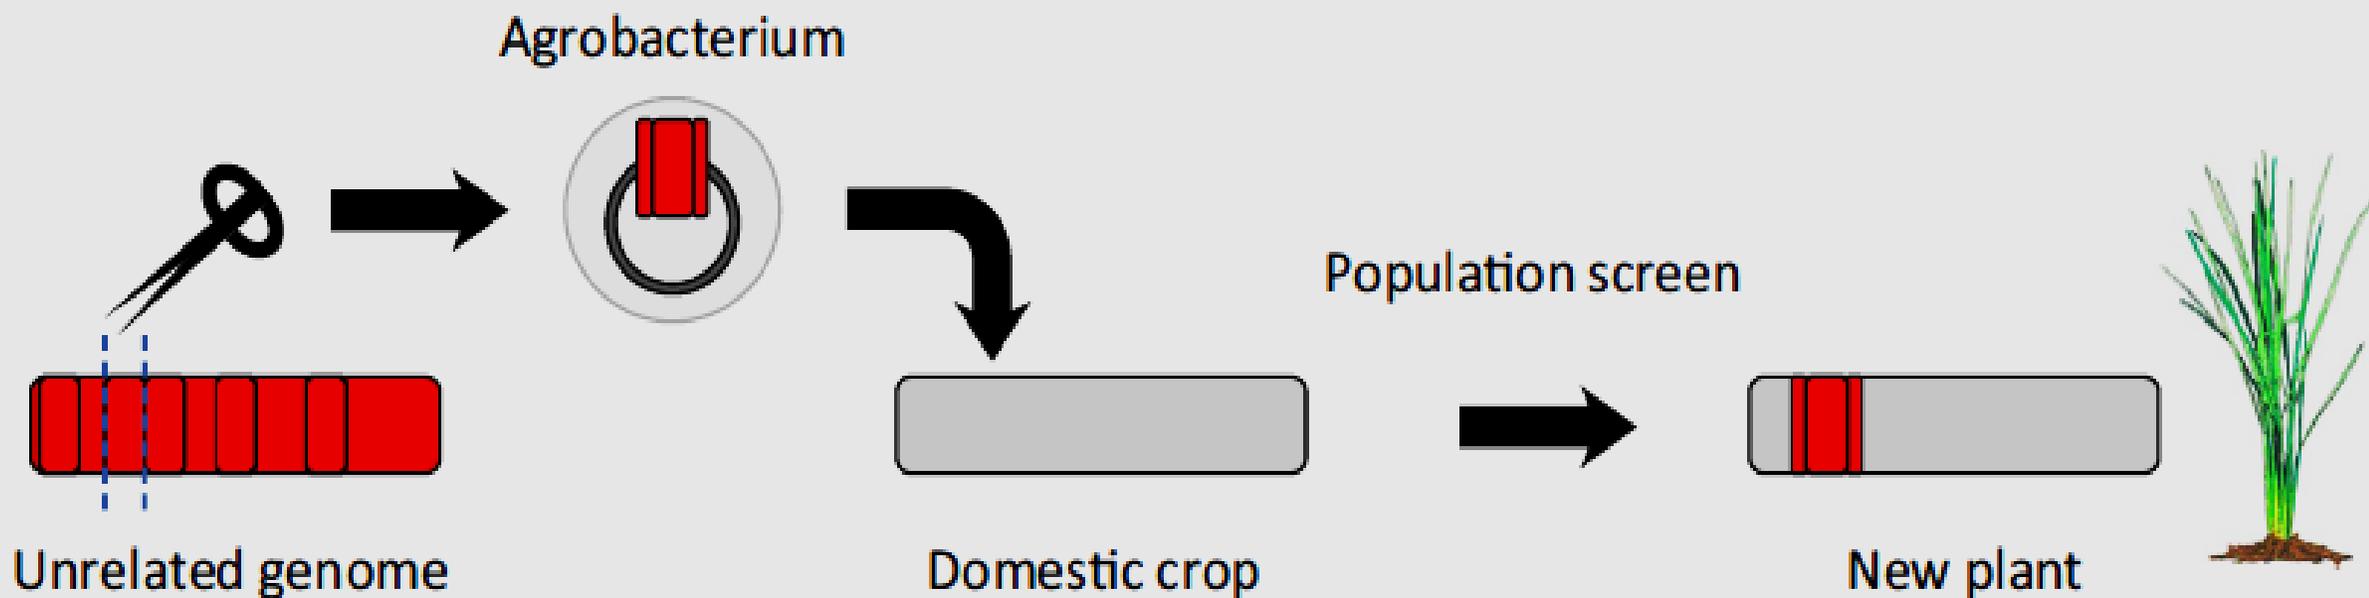

No GM techniques used in process

Product not GMO

# Biotecnología moderna (1980-2000)

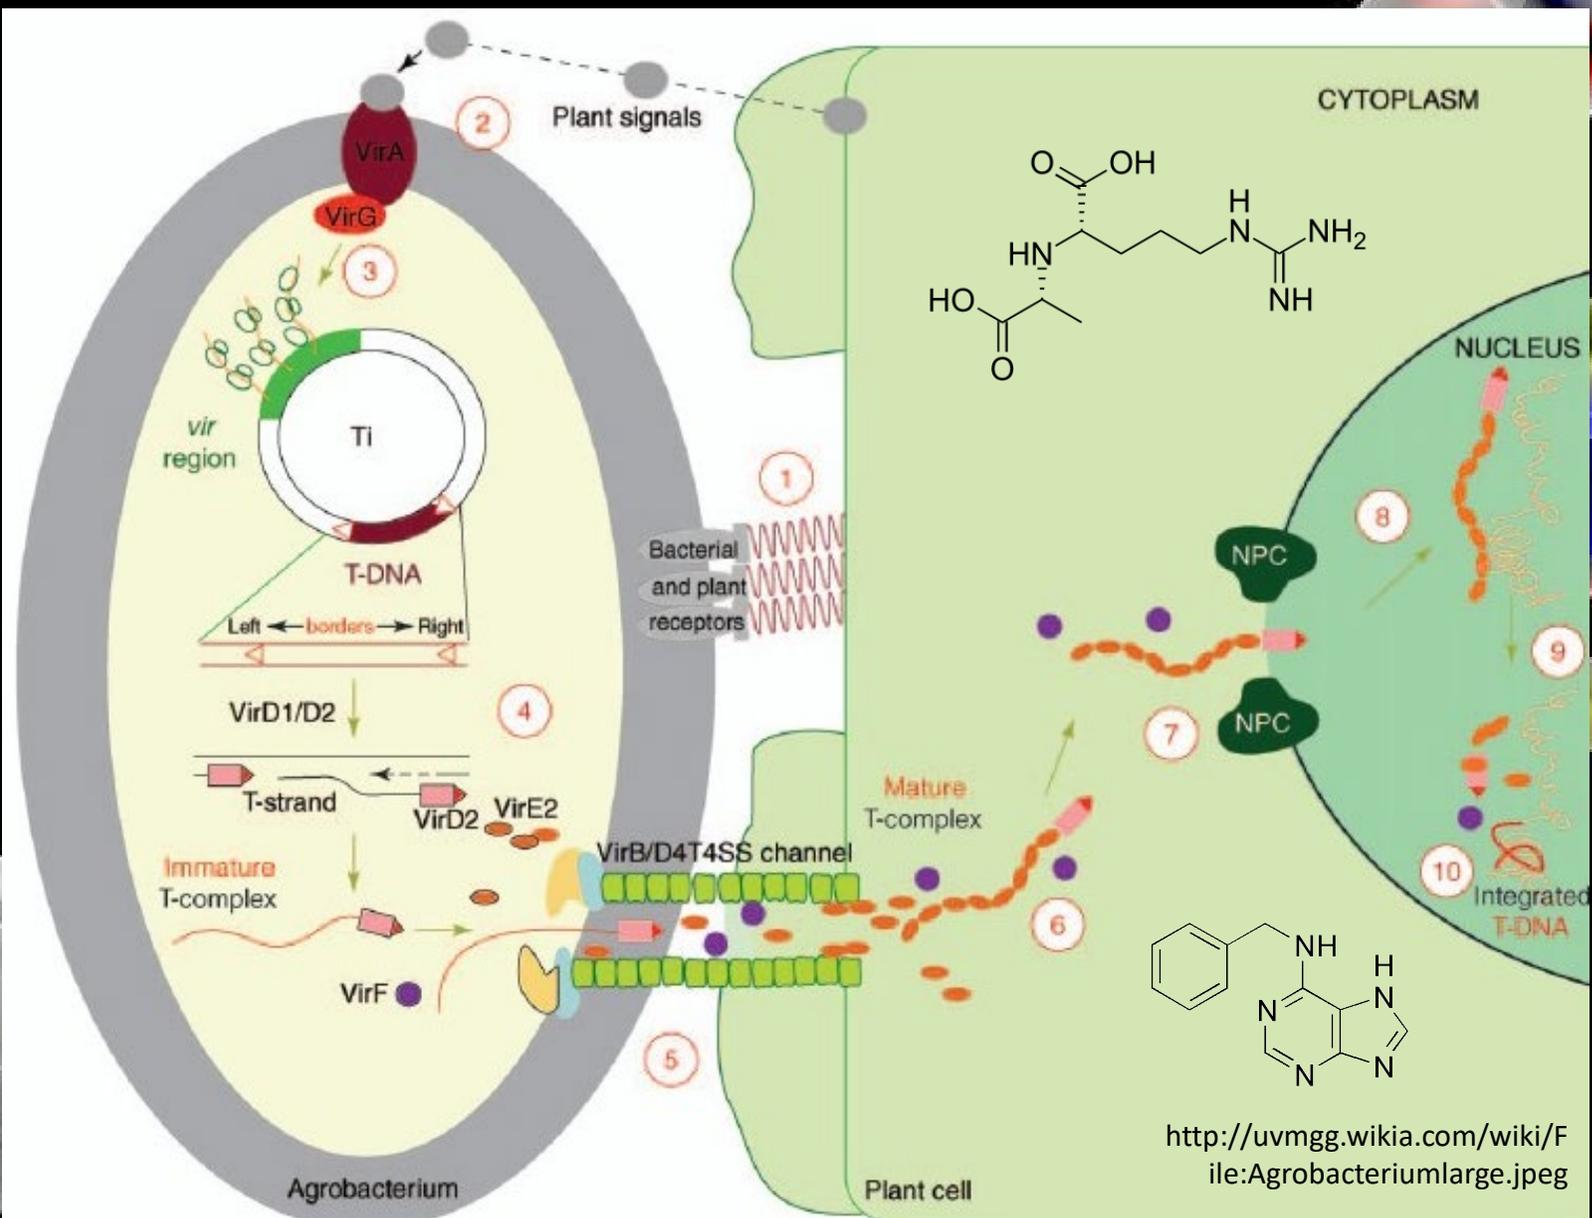

## (B) Transgenesis

GM techniques used in process  
(new gene material inserted)

Product GMO

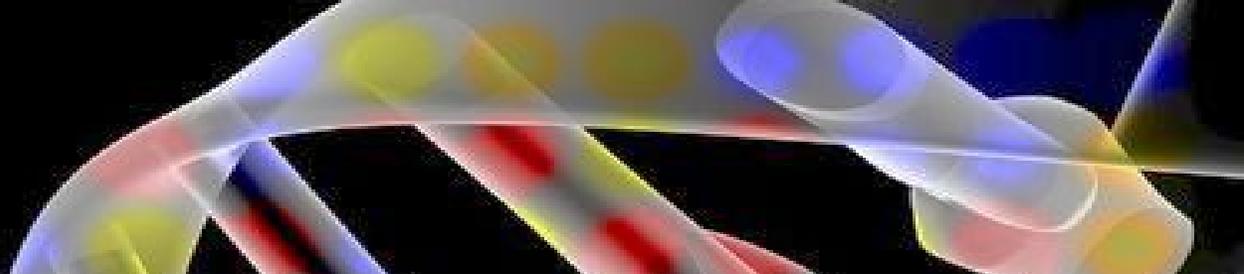

# Agrobacterium tumefaciens

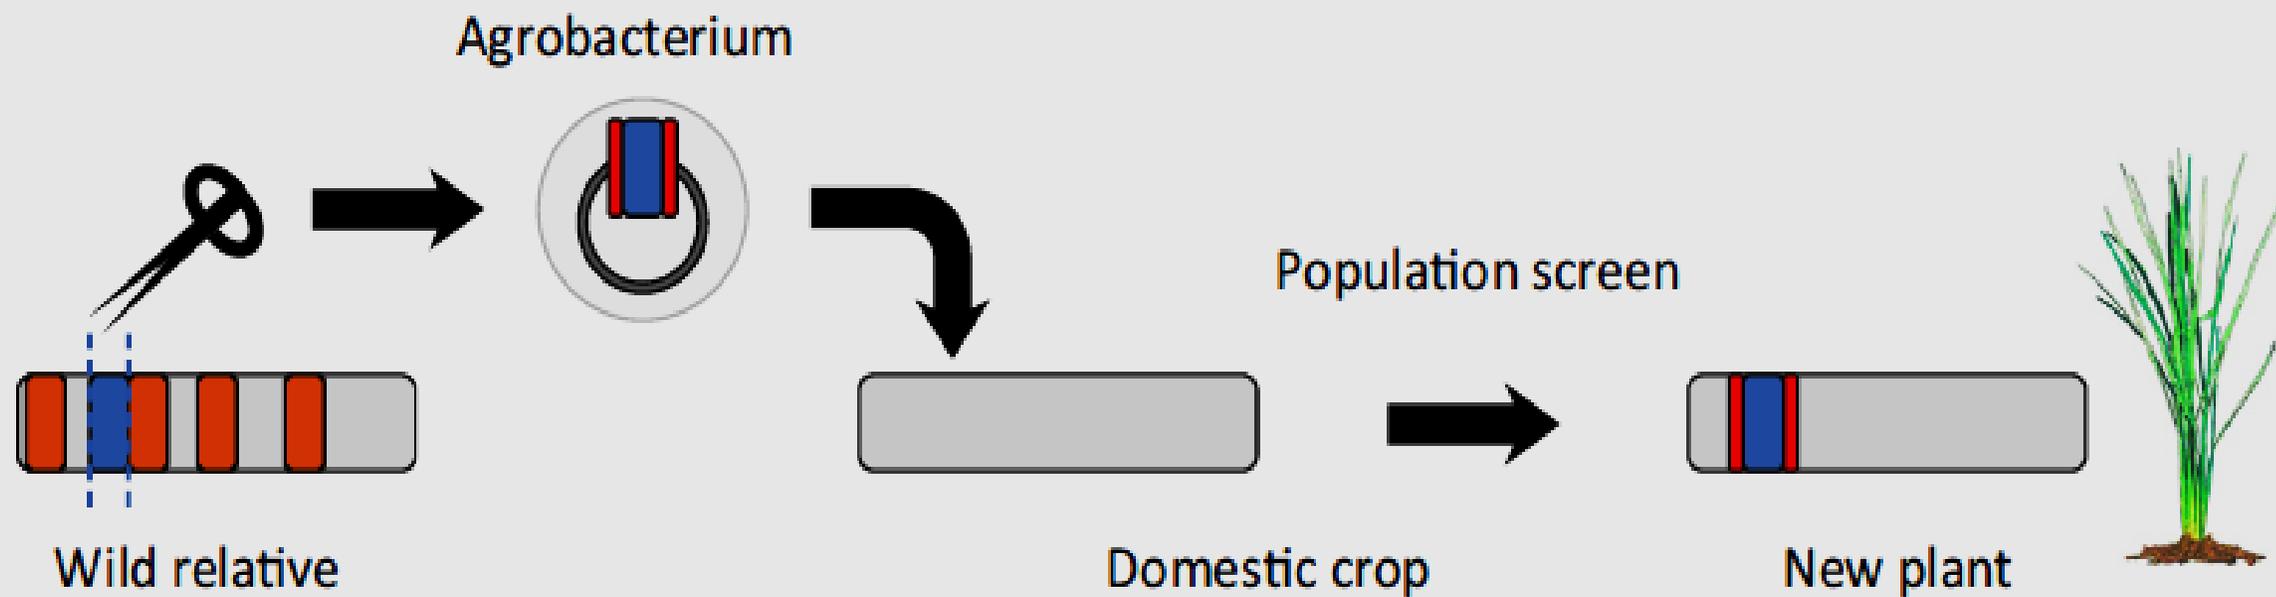

<http://uvmgg.wikia.com/wiki/File:Agrobacteriumlarge.jpeg>

# Biotecnología moderna (2000)

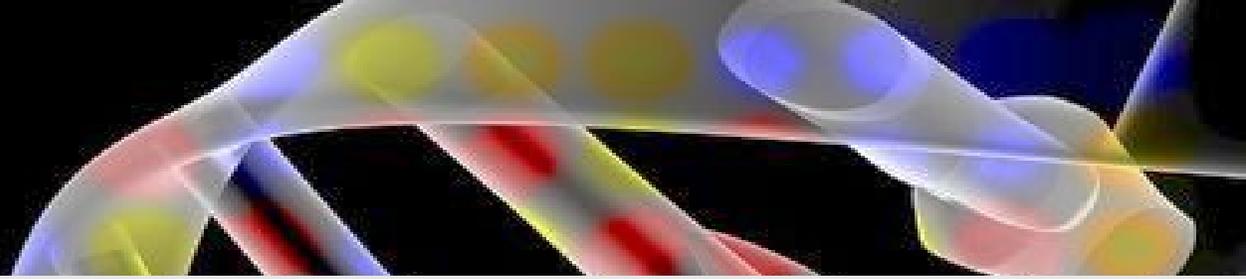

## (C) Cisgenesis

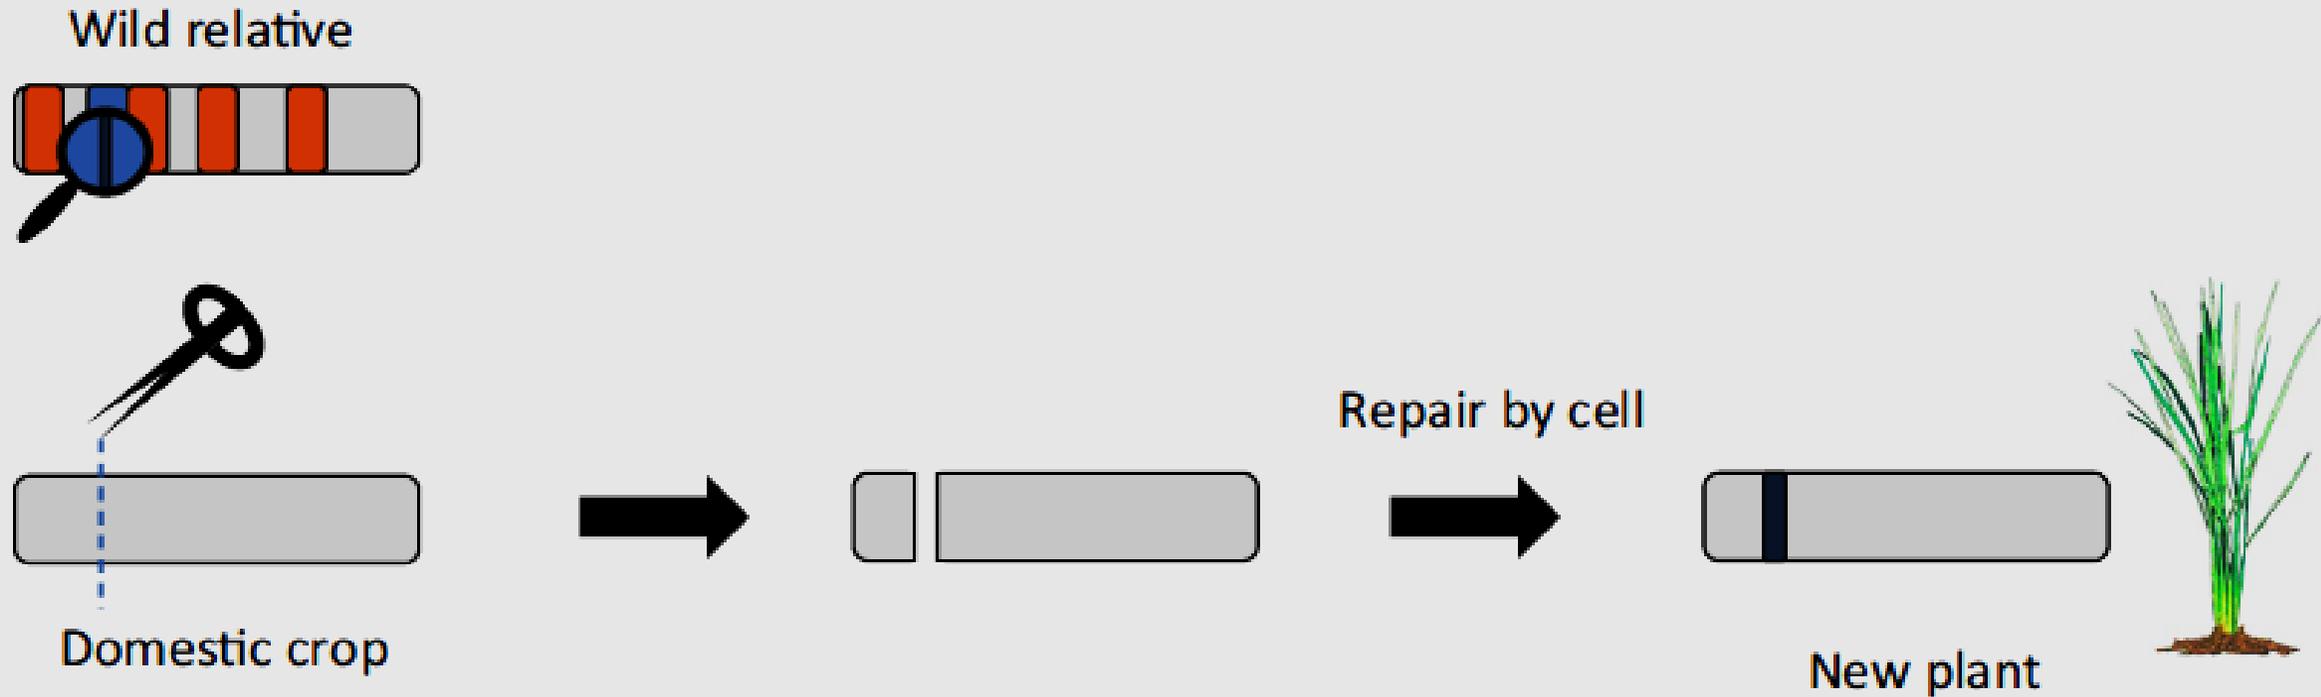

GM techniques used in process  
(new gene material inserted)

Product GMO

# Biotecnología moderna (2015-?)

## (D) Precision breeding

**GM techniques used in process**  
(no new gene material inserted in product)

**Product GMO ?**

# Gene-edited CRISPR mushroom escapes US regulation

A fungus engineered with the CRISPR–Cas9 technique can be cultivated and sold without further oversight.

# Total agricultural area over the long-term

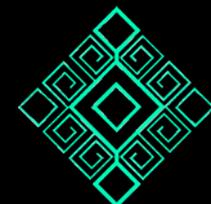

Total areal land use for agriculture, measured as the combination of land for arable farming (cropland) and grazing in hectares.

Our World  
in Data

ECOSUR

# Agricultural area per capita

Agricultural land area per capita, measured in hectares per person. The UN Food and Agricultural Organization define 'agricultural area' as the sum of arable land, permanent crops, permanent meadows and pastures.

# Multi y trans disciplina para una agricultura sostenible

POR SU ATENCIÓN, MUCHAS GRACIAS!!!
